Systems from VIDEO IMAGE

RideShooting®

We provide ride photo systems for almost all kinds of ride attractions. From flume rides up to hypercoasters, we always have the right solution. The **RideShooting®-System** is easy to handle, delivers high quality pictures and stands for highest reliability.

Digital imaging, FunPhoto Systems

The VIDEO IMAGE PhotoFactory system is a flexible, integrated solution for professional use. Portraits, photomontages and nostalgic photography in outstanding quality. From 9 x 13 cm up to A4 size, fast and easy to brilliant results. The intuitiv GUI allows a fast and easy operation. The software is very flexible and can be easily adapted to the customers requirements.

Quality and Service

VIDEO IMAGE – 13 years of experience and the permanent development of our photo systems let the number of our customers grow. Our product range reaches from nostalgic photo systems through digital imaging to ridephoto systems with one or more cameras for modern hypercoasters. To guarantee a trouble-free running of the photo systems, we make use of high quality components, produced by reliable manufacturers.

The in house development of the hard- and software gives a very high flexibility, to react fast and uncomplicated to customers requirements.

By the integration of a Cardcam terminal, the visitor has the possibility to send a bought picture as a greeting card by e-mail. This improves the attractiveness of the Ridephoto® -systems and a personal recommendation from friend to friend is a very reliable and qualitative way of communication between people.
